

Casual Bin-Hire Module

Skip/hook-lift casual bin-hire bookings and billing

Wondering how to simplify your booking, pricing, scheduling and billing processes for ad hoc casual hire service management? Wastedge's web-based solution takes care of this for you.

This Module will validate the address of a new booking to ensure you're sending drivers to the right place. **It auto-prices jobs using map integration with easy-to-draw map zone boundaries**; sets add-on tipping prices per ton for account customers' designated preferred tip-sites; and allows you to **view location of jobs against truck location data** from the Wastedge GPS module in order to identify nearest available bins and vehicles.

It **simplifies workload balancing across multiple drivers** by using a whiteboard-like drag-and-drop scheduler. You can also view and **manage bin stock and movements** to ensure bins are available at correct depot or tip-site for future date bookings.

It'll even **keep track of what you owe owner drivers** or subbies and produce payment summaries based on jobs allocated.

Main features...

Jobs list allocation screen

Shows jobs list per vehicle group, links to jobs on map to see nearest bin or driver.

Key benefits

- Streamlines in-field communications
- Saves driver time and admin effort
- Reduces data transcription errors
- Reduces travel distances and costs
- Improves management visibility
- Reduces bin loss/misplacement
- Remembers future jobs

Additional features...

- Fast find prior booking by phone # or address
- Look up address on map and see 'street-view'
- Integrated with GPS module to see nearest truck
- Pending jobs can be viewed by job type/bin size on the map
- Jobs can be auto-priced using user-drawn zone boundaries
- Nearest available or vehicle will be suggested
- Electronic jobs dispatched to mobiles
- Real-time driver confirmations
- GPS and vehicle data capture
- Electronic proof of pickup GPS or signatures
