

Residential Kerbside Clean-ups

Residential inorganic hard goods, white goods, eWaste and dumped items

Looking for a way to make kerbside clean-ups more efficient? Then you'll love this Wastedge module.

It provides field staff with mobile tablet apps to **facilitate the inspection of illegally dumped waste and vandalised or graffitied sites**. Field staff can create or review clean-up job requests that show the exact GPS location of the job on their mobile or tablet. And **even link photos to the job** at the problem site.

This app also helps clean-up crews see where their daily work list of kerbside collection points are on the map, then navigate to collections (with shortest path voice navigation mapping) and then **grab proof-of-clean-up photos** that can be used for applicable excess volume charges.

Extremely versatile, these apps **can also apply to park bin inspections, relocation mapping, bin repairs and vandalism frequency tracking**.

Key benefits

- Helps clean-up crews locate jobs
- Helps with proof of service
- Records field staff movements
- Facilitates efficient scheduling by geographic area saving field staff travel time

Additional features...

- Shows clean-up points on map
- Links photo to job/location
- Real-time feedback of job status
- Enables receipt of new job requests
- Enables composition classification
- Integrated navigation guidance

Main features...

View job locations on map

Group by suburb or re-arrange by drag and drop for efficient sequence.
