

Residential On-board Module

Residential on-board driver support systems

Want to simply residential collections? Then empower your drivers! Wastedge's web and mobile software solutions will make your drivers more efficient instantly.

Drivers log in to their allocated run areas for a date and get a list and map of all addresses to be done. Any re-visit jobs for missed services are highlighted with "take me there" voice navigation guidance option.

The truck lift arm records a pickup at GPS points for time/date proof of pickup and the software matches the lift to adjacent service points. **On-board maps help drivers pinpoint where they are and avoid road blockages.**

If the driver presses an incident button, the software grabs related pictures from on-board cameras, sends them back to dispatch and flags the site. Any unregistered lifts (no nearby assigned property or more lifts than allocated) are also marked, **enabling drivers to quickly see what's done and what's not.**

Key benefits

- Reduces missed service complaints
- Streamlines driver communications
- Saves driver time and admin effort
- Improves management visibility
- Facilitates street section re-assigns for breakdowns or traffic delays
- Shows real-time route progress
- Reduces new driver training time
- Improves customer service info
- Fast street find for lift trail replay

Main features...

Automated data capture

Vehicle data from lift-arm sensors combined with GPS location or RFID tag readers can tick off assigned jobs so driver can see what's not yet done, reducing missed service complaints.

Real time GPS trails monitor

Driver voice navigation guides

Additional features...

- Facilitates driver's tagging/alerts for problem sites
- Provides drivers with automated proof of pick-ups
- Helps drivers provide accurate problem locations
- Automated capture of presentation rate statistics
- On-screen, auditory or voice alerts for walk in services
- Optional VoIP communications (driver to driver or dispatch)
- Enables GPS save of expert/most efficient route
- Facilitates new driver training with voice nav guides
