

Weighbridge Module

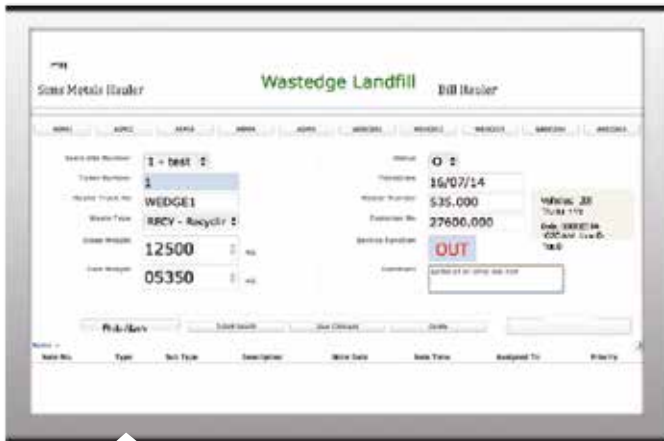

Integrated weighbridge scale data capture, gatehouse ticketing and billing

Looking for an easy way to capture reliable vehicle weight data? Our weighbridge gatehouse software module runs on a local touch screen or tablet. Using WiFi, it can connect to the scale for automated weights captured against registered vehicles or one-time visit public vehicles.

With this software, you can on-charge EPA levies or extra charges for tyres, mattresses and special material rates per customer or hauler with **powerful pricing options**. Weight field selection is automated based on regular vehicle or related waste type transaction defaults for Gross IN or Gross OUT to support typical transfer station operations.

Weighbridge accumulates material movement summaries per waste or recycle stream into site totals and diversion percentages. **This module supports account customers**, haulers and outbound deliveries and COD receipts.

Main features...

Gatepost ticket print

Touch screen fast input

User configurable one-touch buttons for regular vehicles and fast number plate search (default last related data) speeds vehicle throughput.

Key benefits

- Fast vehicle ID lookup/throughput
- Reduced data entry effort
- Simple, flexible pricing
- Integrated to Wastedge billing
- Material, value and vehicle movement summaries
