

iWaste Mobile iPhone Apps

Regular collection runs and bulk skip mobile order management software

Looking to make your business more efficient? Then you need iWaste for Bulk Skip Hire Operations and Regular Waste Collection Operations.

Why do customers use iWaste? Because it **saves drivers travel time and paperwork; they can log while in field and download daily job lists to their iPhones.** Drivers can see where jobs are on the map, get voice navigation and map guidance to new jobs as they come in and **send real-time job status updates back to base** with a simple finger tap.

Using their iPhone, field staff can locate service addresses on the map, and reorganise sequences accordingly, then **capture on-screen customer signatures, tick off work check-lists, add site photos or notes to the job, select job fail reasons or update job confirmation data back to base.**

iWaste Apps can be configured for either regular collection work lists with quantity of bins per job OR for bulk waste jobs where there may be disposal weight details attached to each job or to the run list in summary.

Main features...

Re-order jobs by drag and drop

Drivers can easily rearrange jobs when they encounter traffic, blockages or blocked access, and get voice directions to new sites.

Key benefits

- Simple to learn and use
- Saves travel time by integrating maps
- Eliminates admin and driver paperwork
- Streamlines communications and data flow
- Supports real-time GPS tracking of devices
