

iWaste Truck Tracker

Mobile field staff truck tracker app (travel trails and driver messages)

Like more visibility of your mobile operations staff movements? Want better communication with staff who're often out of their vehicles dealing with bins?

This iWaste mobile software module runs on iPad or iPhone devices and tells supervisors which drivers/vehicles are online, where they are on the map and event details. It also **shows travel trails for job confirmations or fail events and displays wait-time events** to tell you how long field-staff were stationary at any point along the trail.

Operations supervisors can **enter and send messages to driver's mobile** and receive replies.

These Apps **can also be used to monitor Commercial Collection Routes, Bulk Skip/ Hooklift operations, Residential Collection Routes or even Sales Reps** - wherever field staff are using Wastedge Mobile Apps that communicate with iWaste Truck Tracker.

Main features...

Shows GPS trails and lift-points

Helps mobile supervisors find or monitor active truck locations.

Key benefits
